

Foxfire WMS Advanced Shipping Module

Carrier Compliance

Support for UPS, FedEx, FedEx Ground, USPS, Airborne Express, DHL, LTL

Fully Automated

Upload shipping information directly to the shipper's data processing system for fully automated package sorting, billing and tracking.

Compliance Documentation

Prepares all compliance documentation including hazardous materials and international shipments.

Rate Shopping and Routing

Upload shipping information directly to the shipper's data processing system for fully automated package sorting, billing and tracking.

More Efficient

Fewer key entries, reduced training, improved service times, the ability to track packages by your own internal reference number, and simplified billing procedures

The Foxfire WMS Advanced Shipping module integrates seamlessly into Foxfire's flagship warehouse management system allowing optimum flexibility and improved shipping productivity. The Advanced Shipping Module calculates freight costs, updates the order, generates the carrier label, and prints the appropriate shipping manifest as well as providing all necessary compliance documentation for international and special shipping services. The Advanced Shipping Module also allows the operator to compare carrier rates and select the most cost-effective carrier both at the individual package and shipment level.
