

Foxfire Warehouse Management System (WMS)

The Right ScanSource ISV Partner for WMS

With Foxfire's award-winning Warehouse Management System, Foxfire WMS, and 20 plus years of experience in the industry, Foxfire can help our partners develop a significant new revenue stream.

Key Partner Benefits:

- Help your clients improve their operation with a real-time WMS. Your clients will increase accuracy, improve labor efficiency, and reduce errors.
- Increase your sales of equipment and media, including mobile handheld units, RF / wireless infrastructure and barcode hardware. Foxfire is happy to help you with equipment-related questions, but the equipment and media sales are yours.
- Develop an entirely new revenue stream around WMS software licensing and/or WMS recurring subscriptions. Foxfire will share WMS license and license subscription revenue with our partners, generously.
- Benefit from WMS private label options available.

One Size Does Not Have to Fit All:

Whether your clients have a 20,000 square foot start up operation or a 500,000 square foot distribution center, Foxfire has a solution with different programs specially designed for different types of warehouse operations.

For small and medium size businesses (SMBs), Foxfire can help you deploy just the basics with WMS Core, or we can help you deploy a more advanced initial solution with WMS Express. WMS Core is designed to handle the basics of a warehouse management system, and WMS Express is designed for mid-market warehouse operations with more complex needs.

Foxfire can also handle the sophisticated needs of large warehouse operations. The WMS Enterprise solution is currently deployed in large distribution operations.

Each of Foxfire's WMS solutions are upgradeable to the next higher level of solution, allowing Foxfire to grow with you as your customer's business grows.

Foxfire's Real-Time WMS Functionality is Easy to Use and Includes the Following Major Functional Areas:

- Receiving
- Location Management
- Barcoding
- Real-Time, Wireless RF Handheld Communication
- Putaway
- Material Handling and Movement
- Inventory Management and Cycle Counting
- Standard Reporting and Labeling
- Waving: Grouped Release of Orders
- Batching: Batching Picks and Tasks
- Picking
- Packing
- Shipping

Integration to ERP and Warehouse Automation made Systematic:

Foxfire's years of experience in the industry can be leveraged to connect all needed business systems and warehouse automation to Foxfire's WMS. Our standard ERP integration scenario works for any ERP. Foxfire has interfaced with many types of warehouse automation including picking modules, conveyor systems, in line scales, packaging systems, carousels and warehouse control systems.

Industry Experience:

Foxfire has deep experience in many industries including retail, manufacturing, electronics, telecom, apparel, emergency management, government and 3PL. Foxfire can support finished goods inventory, raw materials inventory and work in process (WIP) inventory.

Foxfire Means Success:

In a market where success does not come easy, Foxfire has excelled in providing successful and profitable implementations. Foxfire is dedicated to client success and to long term relationships.
